PSG Solutions

JOB # 01

HELPING CUSTOMERS GROW THEIR BUSINESSES

Seasoned and flexible team of consultants and developers working with you to deliver great products, services and programs

SOFTWARE DEVELOPMENT

Do you need a software development company? Are you interested in outsourcing but not off-shoring? We're PSG Solutions. A full-stack software development and engineering firm that specializes in both mobile and web application development. We have decades of experience working with clients from all around the world, helping them build their products from scratch to launch. Our boutique agency is comprised of talented engineers and delivery professionals who are passionate about what they do, which means we'll always go above and beyond for our customers every step of the way. Whether you're looking for an experienced partner or just want to chat about your project, we would love to hear from you!

We rapidly develop applications for Android, iOS, and Web, testing technology and design concepts through rapid prototyping, and iterating with the customer organization to move quickly to a production release. Unlike off-shore development agencies we do not offer the "kitchen sink," we are a cross-platform, full stack JavaScript / NodeJS, React/React Native, EXPO, and Flutter development shop, we stick what we do well and are not trying to be "all things to all people."

AGILE DELIVERY

The PSG Solutions Agile Delivery Program is designed specifically for IT Groups who want more than just another certification program or training course – it's an opportunity to learn from industry professionals while building real-world skills that will give you a competitive edge over other developers in your field. With this program, we help our customers dramatically increase their knowledge base and improve their ability to deliver quality code and technology programs on time every time! We can provide complete outsource support with our certified agile practitioners or, if you prefer, we can provide training, coaching, consulting, and mentoring to your team on the agile mindset and associated delivery frameworks.

IDENTITY

Identity and access management (IAM) is the business of managing digital identities. It's an important part of any organization, but it can be difficult to manage. The PSG leadership team has more than 3 decades of experience in both consumer and enterprise identity initiatives across multiple industry sectors. If you are interested in hearing more about how PSG and our partners are transforming entities in delivering world class identity give us a call, we'd love to connect with you.
